### Technological Revolution for a Smart Living

The rise of technology is transforming almost every aspect of our modern life. The cluster of technological advances are changing how people live, work, and play. In recent times, there is an upsurge in the number of societies or gated communities offering a wide range of amenities and other features. Management of such large condominiums is often a challenge in today's busy lifestyle.

The tech-savvy generation usually requires smart apps which may help them interact with the society smoothly. This is where Smart Town app steps in! A one-stop solution for a smart housing society management.

"A fully integrated cloud-based Mobile & Web app conceptualized to reduce housing society complexities and provide a secure as well as hassle-free lifestyle."

### About Smart Town

**A fully automated solution to simplify housing society activities.**

Tired of maintaining multiple excel sheets for member phone numbers, bills, addresses or vehicle details? Not able to address society complaints or track due maintenance? Often, the managing committee has no clue of how to manage the operations smoothly. Due to lack of appropriate tools complex operations get delayed, are full of errors and are time & money consuming.

Well, it's now time to sit back and relax, as Smart Town Mobile and Web app has got you covered. It is an innovative product powered by KCS, having an industry experience of over 16 years delivering a plethora of quality solutions globally. Smart Town app is specifically designed to simplify the gated communities' management and operations and is one of the easiest and the fastest way for society to function smoothly. A customized, one-stop solution provides a smarter living option by integrating various processes for committee members, residents, owners, builders, vendors and any other individual that interacts with the society.

### App's Core Features:

**A centrally controlled, fully automated management software consisting of 3-in-1 integrated modules.**

A refreshingly easy-to-use, simple to configure solution in the cloud and on mobile power-packed with the following features:

### Technical Integration:

- Automated Gate Controls
- Biometric / Retina Scanners
- Vehicle Smart Tags
- Access Control
- RFID Cards
- Escalator Controls
- Payment Gateway
- Kiosk & Touch Integrations

### Benefits of Smart Town

- Admin can simply manage operations through Mobile & Web
- Resident Members can easily access Web & Mobile Device
- Tablet App for Security Guards
